Senior Frontend Developer (m/f)

The Berliner Philharmoniker, "the world's best orchestra" (The Guardian), is looking for a Frontend Developer (m/f) for the Digital Concert Hall team at Berlin Phil Media GmbH, a 100% subsidiary of the Berliner Philharmoniker Foundation.

The Digital Concert Hall (https://digitalconcerthall.com) is the leading international video streaming platform for classical music concerts and has helped shaping the radical changes in music consumption in the internet age as befits the reputation of the Berliner Philharmoniker.

We produce premium quality concert videos and distribute live and on-demand streaming for a broad range of technical platforms (web, mobile, smart tv, set top boxes). The Digital Concert Hall is a paid service, available globally with client interfaces in six languages. The team responsible for the service is in charge of the whole value chain from content production to its distribution. We own the complete tech stack and aim to always be on the forefront of technical developments in every area that matters to the service.

As a Frontend Developer you join our growing product team of creative Developers, Product and UX/UI Designers. You work on the Digital Concert Hall user interface and build new tools for the service, beginning with a focus on the currently running rewrite for the majority of our web applications.

The stack you can build on: React.js with Redux.js, Webpack with Babel and JavaScript in ES6. The apps are backed by a powerful REST API.□ We take unit- and integration test of our code seriously and automate processes as much as possible.

Your responsibilities
- Collaborate on planning and implementation of our web apps and website with the UI / UX team and the dev team
- Building web applications that are responsive, performant, and accessible
- Become or be proficient in modern JavaScript
- Participate in design and code reviews
- Built upon and improve our product
- Make sure test coverage is solid and robust code gets shipped
- Use the available options and enable data-driven product and feature decisions

Your skills

- 4+ years of HTML / CSS experience, including concepts like responsiveness, accessibility, cross browser and pre-processors
- Building maintainable and scalable styles, with familiarity in architecture patterns like SMACSS, BEM or Styled Components
- Experience with and passion for JavaScript
- Experience with ES6 and a modern JavaScript framework like React, Angular, Polymer, Ember.js or Vue.js
- Be passionate about your work
- Demonstrated design and UX sensibility
- Fluent in German and / or English

What we offer

- Work with talented people on a product that delivers some of the best performing arts content to a very enthusiastic user base
- Work on a engineering driven product
- You shape a unique global service together with a small but powerful team
- Competitive rates of pay and flexible working conditions
- A great working environment at Potsdamer Platz in Berlin
- The tech equipment you need to produce your best work
- Possibility to attend or speak at conferences

How to apply

We know that experience comes in many forms, several skills are transferable. Apply if your experience is close to what we're looking for, passion goes a long way!

Send a mail to development@digitalconcerthall.com and include a link to something you're proud of: a portfolio, code samples and/or Github account.

Please use "DCH8AU7D" on https://www.digitalconcerthall.com/de/tickets to redeem a free 7 day access to the Digital Concert Hall.
